30. If we _____ (protect) the forests, we _____ (help) our planet.

VII. Read the summary of an article choose the best answer A, B or C.

Have you ever wondered about changes of the future houses? We have gathered together some predictions regarding future houses: what will they be like? How will they be organised?

First of all, technology will be an effective tool to help improve our quality of life. There will be “smart homes” with high-tech appliances. People will use a phone app connected to home equipment and give orders. More houses of the future will be smaller because of the “living alone” trend. Smaller space makes one room become multifunctional: kitchen, dining, sleeping, and working. People also love the idea of motorhomes which helps them to change their locations. Imagine living in different cities every month, that’s fantastic! Another idea of future houses states that every individual house and building will become a power plant with renewable energy sources. There will be different alternative energy sources to use in houses because people care more about the environment.

31. What is the passage about?

- A. Future houses B. Changes in technology C. High-tech appliances in houses

32. What will be an effective tool to create better living conditions?

- A. multifunctional rooms B. smart device C. technology

33. According to the passage, what can people do with a phone app?

- A. to connect with other people
B. to connect with home equipment
C. to give orders in their homes

34. What can we understand the word “multifunctional” in the passage?

- A. having many appliances.
B. having several different functions.
C. having only one function.

35. What is NOT mentioned in the passage?

- A. motorhomes help future people to travel around.
B. People in the future no longer care about the environment.
C. In the future, every house or building might use different sources of renewable energy.

VIII. Combine two sentences to make a complete sentence using suitable possessive pronouns.

36. My robots is smaller than your robots.

=> My robots _____.

37. Your sister is younger than her sister.

=> Your _____.

38. Their vacation is longer than my vacation.
