| 10. A comet moves through space.                      | TRUE | FALSE |
| 11. Our solar system has only one planet.             | TRUE | FALSE |

**Read the paragraph. Complete the sentences with the words in the box.**

telescope    spacecraft    observatory    universe    meteorite

Marco wanted to be an astronaut someday and travel through the universe in a \_\_\_\_\_. One day, Marco found a large, shiny, black stone in the park. He showed it to his father, who is a scientist.. His father said that the stone could be a \_\_\_\_\_.

He asked Marco to bring the stone to the \_\_\_\_\_ where he worked every night.

"We'll show it to the other scientists," he said.

"You can also look through the \_\_\_\_\_ there". Marco was excited.
