Part III - INSTRUCTIONS

5. Read the instructions below and match them to the reasons that follow. (20 points)

Bicycle Safety Information

Instructions

1. Wear a helmet.
2. Make sure your bicycle is in proper working condition.
3. Avoid leaving your bicycle outdoors in bad weather.
4. Check that your tires are inflated to the pressure recommended on the tire sidewalls.
5. Check that your wheels are straight.
6. Check your brakes.
7. Use a working headlight and a taillight when riding in the dark.
8. Use special care when off-road riding.

Reasons

- a. An uneven wheel or wobbly rim may make your bicycle unsteady.
- b. Exposure to rain or snow may damage your bicycle's systems.
- c. An unprotected head is highly susceptible to injury.
- d. Press each brake lever to make sure that the brakes move freely and stop the bike.
- e. Increased visibility makes drivers more aware of bicycle riders at night.
- f. Spend a few moments before each ride to check your bike's systems.
- g. Rocks, branches and depressions may throw you off balance.
- h. Inadequate inflation causes instability and may cause you to skid.
