Last year, my teacher asked me to give a short speech in front of the whole class. At first, I felt a little nervous because I had never done it before.

I had practiced my speech at home many times. I knew all the words and felt ready to share my thoughts. So, when it was my turn, I took a deep breath and walked up to the front of the class.

I looked at my friends and my teacher, and I started speaking. At first, my voice was a bit shaky, but I kept going. I talked about my favorite book and why I liked it so much. As I spoke, I noticed something amazing. My friends were listening, and my teacher was smiling and nodding.

I felt more and more confident with each word I spoke. I realized that I knew a lot about my favorite book, and I was excited to share my knowledge with everyone.

When I finished my speech, my classmates clapped and said nice things about it. I felt so proud of myself. It was a wonderful feeling. I learned that when I practice and believe in myself, I can do anything, even speak in front of the class.
