atmosphere	wind	sky condition
temperature	precipitation	humidity

The weather affects us in many ways. Its changes can influence how we feel and the way we look at the world. The 1. \_\_\_\_\_ refers to the hotness and coldness of the environment. The hotness and coldness of the environment changes every time because of the moving air called 2. \_\_\_\_\_. At night we feel cooled because of the moisture or the amount of water vapor in the air that is known as 3. \_\_\_\_\_. As we wake up in the morning we look outside to see the 4. \_\_\_\_\_ to do the different activities of the day. If the clouds are dark, it means that the water will fall to the ground as rain which is referred to by forecaster as 5. \_\_\_\_\_.
