Robots

Activity 2

Interactive

Ahmed is learning about robots.

Explain robots in general terms.

Use the words to fill in the blank spaces.

move	different	things
actions	sense	machine

The word 'robot' means ..... things to different people. In general, a robot is a ..... that can independently:

- ..... its environment.
- carry out calculations to make decisions.
- do ..... in the real world.

Many electronic systems have the ability to sense, compute and act, for example, air conditioners, traffic control systems, and weather stations. Robots are different from other electronics because they can ..... and/or manipulate .....
