

Open the document you want to print on your device

Go to the file or options menu of that program

Look for the "Print" option or a printer icon. You can usually find it at the top of the menu.

Click "Print." A window will open with printing options

Be sure to select the printer you want to use if you have more than one.

Check print settings such as number of copies, page range, orientation (landscape or portrait), etc.

Once you have reviewed all the settings, click "Print" or "OK."
