READING

they can take you anywhere at any time	**it is a modern means of transport**
visitors can use in the city of Athens	**the suburban railway is the interchange**
Athen's metro is the quickest solution	

There are many means of transport that (**31**) _____, the capital of Greece. In order to move around inside the city there is a wide network of buses leading to different areas of Athens, then there are trolleybuses which move with the help of electricity and cover a wide area as well.
(**32**) _____ but since it is quite new in Greece it doesn't yet cover every single prefecture but there are plans for expansion so that other locations are served as well. The metro has connections with the railway train of Athens which can take you from the Port of Piraeus to the northern suburbs with many stops in between.
(**33**) _____ of the metro which will take you to the Athens Airport and a few more areas which are a bit far from the center of Athens but inside the prefecture of Attica.
Moving on with the tram, (**34**) _____ preferred by many people since it connects areas that didn't have adequate transportation before and it passes by locations where there are no metro stations. Taxis are cheap in comparison to other European countries and (**35**) _____ since they are easy to find and quick if there is no traffic.

Choose true, false or no information.

In Western countries, electricity, gas, and water are not luxuries but necessities. Companies now realize that consumers want products that will not only work effectively, but also save money.

For most North American households, lighting accounts for 10 percent to 15 percent of the electricity bill. However, this amount can be reduced by replacing an ordinary 100- watt light bulb with an energy-saving bulb. These bulbs use a quarter of the electricity of standard bulbs and last eight times longer. Therefore, consumers can save about US$7 to US$21 per bulb. In Europe, there is a labeling scheme for refrigerators, freezers, washing machines and tumble dryers. The label tells the consumers how much energy efficiency each model has, compared with other appliances in the same category. Ultimately, these innovations will save money as well as conserve the Earth's resources.

36. In Western countries, energy is cheap.
A. False B. True
37. Consumers can save money by using energy-saving bulbs.
A. False B. True
38. Labeling scheme is a good innovation which helps the European to save money and natural
