When I finished high school, I decided I wanted to <sup>1</sup> \_\_\_\_\_ to university and <sup>2</sup> \_\_\_\_\_ biology. If you're interested in any subject linked to science, it's good to know English well because so many research articles are in English, so I decided to do a course and take an exam.

The day of the exam I was very nervous. I can <sup>3</sup> \_\_\_\_\_ lots of information very easily, which is a good thing if you like science and facts, but to <sup>4</sup> \_\_\_\_\_ an English exam you need more than information, and I didn't want to <sup>5</sup> \_\_\_\_\_ it. I <sup>6</sup> \_\_\_\_\_ the instructions on the exam paper very carefully, and I <sup>7</sup> \_\_\_\_\_ all the questions. And then we got to the Speaking task. I became very scared because you do the Speaking task with another student. But then I remembered about all the times we <sup>8</sup> \_\_\_\_\_ a project and I worked with other students, and I realised it was the same thing. So I relaxed. And I even <sup>9</sup> \_\_\_\_\_ a very good mark.
