### INSECT'S NEST

When it came and built the frame  
on the wall,  
briskly I bruised it  
by a finger.

Twice it came again  
I ignored it then.

Now on the wall it has a shelter  
at the back of my computer;  
a frail one inch hollow tube  
upside open downside closed  
clipped to the wall.

It's a tiny wasp  
may be with family it lives;  
they come and go.

Ain't all the great constructions  
like insect's nest  
brittle and fragile  
sure to go  
today or tomorrow  
measured by time?  
Why bother about any mark made of lime?
