IV. Identify the following hand tools and complete the table below.

	NAME	DESCRIPTION
	36. _____	37-38. _____
	39. _____	40-41. _____
	42. _____	43-44. _____
	45. _____	46-47. _____

V. Using the *Venn Diagram* below, show the similarities of and differences between Fishpond and Fishpen.

LIVEWORKSHEETS

VI. Short Answer.

A. In not less than 2 sentences, answer the following questions. (10 points)

51-52. How do you think raising fish contributes to ensuring that everyone has enough food to eat?

53-54. Why is it important for fish farmers to use methods that don't harm the environment?

54-55. Why is eating fish a healthy choice, and how does raising fish make healthy food more accessible?

56-57. How does raising fish contribute to local economies and the livelihoods of people in fishing communities?

58-60. How can young people like you promote awareness and support for sustainable fish farming practices in our communities?

B. Answer the following questions in not less than 4 sentences. (10 points)

61. – 65. You are tasked with designing a layout for a fishpond. How would you prioritize different areas like the feeding zone, breeding zones, and water circulation systems to ensure the health and productivity of the fish? How might your layout choices reflect the importance of sustainable and efficient fish farming practices?

66. – 70. You live in a coastal community where fishing has been the main source of livelihood for generations. However, in recent years, overfishing has depleted many fish stocks, leading to economic challenges for your community. How do you think starting an aquaculture farm could benefit your community and help address the problem of overfishing?
