Every year, thousands of people come to Edinburgh, the capital city of Scotland to be part of the Edinburgh Festival. For three weeks every August the city is filled with actors and artists from all over the world. They come to Edinburgh for the biggest arts festival in the UK. During this time the streets of the city are alive with music and dance from early morning until late at night. You can even see artists painting pictures on the streets. One of the best parts of the Festival is the 'Fringe', where students do comedy shows in small halls and cafes.

### My love of nature

#### A Sarah

When I was a child at school, I collected books about nature. My classmates and friends all spent their free time playing computer games, so to them I was a bit strange. I loved learning about animals from other countries, but as I got older I found out that my own country has interesting nature too, and that's what I like studying now. I do lots of drawings of nature, and I put them on my blog.

#### B Pilar

I love birds and animals because of all the visits to forests and lakes we made when I was at school. It's a shame that things have changed now. Children these days don't learn enough about nature, so lots of them are afraid of insects, for example. I have a great job because of my love of nature. I'm a nature photographer. It's brilliant, except for the early mornings!

#### C Lia

A few years ago I read a blog with beautiful photos of animals, birds and plants, which made me start really looking at what lives around us. It was just a hobby at first, but now it's my job as I visit schools and give talks about nature. I love it. The only problem is if I am asked to draw a picture. I enjoy it, but I'm terrible at drawing! I'm going to take some lessons to try to get better.

1. Who became interested in nature from seeing someone else's blog?
2. Who says there is something about her job that she doesn't like?
3. Whose friends thought that her hobby was unusual?
4. Who became interested in nature because of school trips?
5. Who says that the type of nature she is interested in has changed?
