

## Countable & Uncountable Nouns

Just as the name implies, some nouns are countable (i.e. 1 chair, 2 chairs, etc.) and others are not countable. The latter refers to things that are not easily counted (like sand or sugar) or to words that refer to a group of items (like furniture or equipment). The charts below identify many uncountable nouns.

### 11-3 NONCOUNT NOUNS

**INDIVIDUAL PARTS = THE WHOLE**  
(Count Nouns)      (Noncount Nouns)

- (a) letters  
postcards  
bills  
etc.  *mail*
  
- (b) apples  
bananas  
oranges  
etc.  *fruit*
  
- (c) rings  
bracelets  
necklaces  
etc.  *jewelry*

Noncount nouns usually refer to a whole group of things that is made up of many individual parts, a whole category made up of different varieties.

For example, *furniture* is a noncount noun; it describes a whole category of things: *chairs, tables, beds, etc.*

### INDIVIDUAL PARTS = THE WHOLE

chairs  
tables  
beds  
etc.

*Mail, fruit, and jewelry* are other examples of noncount nouns that refer to a whole category made up of individual parts.

SOME COMMON NONCOUNT NOUNS: WHOLE GROUPS MADE UP OF INDIVIDUAL PARTS

A. <i>clothing</i>	B. <i>homework</i>	E. <i>grammar</i>	G. <i>corn</i>
<i>equipment</i>	<i>housework</i>	<i>slang</i>	<i>dirt</i>
<i>food</i>	<i>work</i>	<i>vocabulary</i>	<i>flour</i>
<i>fruit</i>			<i>hair</i>
<i>furniture</i>	C. <i>advice</i>	F. <i>Arabic</i>	<i>pepper</i>
<i>jewelry</i>	<i>information</i>	<i>Chinese</i>	<i>rice</i>

## 11-4 MORE NONCOUNT NOUNS

(a) LIQUIDS		SOLIDS and SEMI-SOLIDS				GASES	
coffee	soup	bread	meat	chalk	paper		air
milk	tea	butter	beef	glass	soap		pollution
oil	water	cheese	chicken	gold	toothpaste		smog
		ice	fish	iron	wood		smoke

(b) THINGS THAT OCCUR IN NATURE

(c) ABSTRACTIONS*	beauty	fun	health	ignorance	patience	time
	courage	generosity	help	knowledge	progress	violence
	experience	happiness	honesty	luck		

## The most important thing to remember is that uncountable nouns always take a singular verb.

Another thing to know is that countable and uncountable nouns require different modifiers. For example, the articles *a* and *an* can only be used with countable nouns, which is logical because these words mean "one": a number can only be used with a countable item.

### 11-2 COUNT AND NONCOUNT NOUNS

	SINGULAR	PLURAL	
COUNT NOUN	<i>a</i> chair <i>one</i> chair	<i>Ø*</i> chairs <i>two</i> chairs <i>some</i> chairs	A count noun: (1) can be counted with numbers: <i>one chair, two chairs, ten chairs, etc.</i> (2) can be preceded by <i>a/an</i> in the singular: <i>a chair.</i> (3) has a plural form ending in <i>-s</i> or <i>-es</i> : <i>chairs.</i> **
NONCOUNT NOUN	<i>Ø</i> <i>some</i>	furniture <i>Ø</i>	A noncount noun: (1) cannot be counted with numbers. <i>INCORRECT: one furniture</i> (2) is NOT immediately preceded by <i>a/an</i> . <i>INCORRECT: a furniture</i> (3) does NOT have a plural form (no final <i>-s</i> ). <i>INCORRECT: furnitures</i>

The chart below identifies more modifiers—those that can be used with countable nouns and those that can be used with uncountable nouns.

### 11-5 USING SEVERAL, A LOT OF, MANY/MUCH, AND A FEW/A LITTLE

COUNT	NONCOUNT	
(a) <i>several</i> chairs	<i>Ø</i>	<i>Several</i> is used only with <i>count</i> nouns.
(b) <i>a lot of</i> chairs	<i>a lot of</i> furniture	<i>A lot of</i> is used with both <i>count</i> and <i>noncount</i> nouns.
(c) <i>many</i> chairs	<i>much</i> furniture	<i>Many</i> is used with <i>count</i> nouns. <i>Much</i> is used with <i>noncount</i> nouns.
(d) <i>a few</i> chairs	<i>a little</i> furniture	<i>A few</i> is used with <i>count</i> nouns. <i>A little</i> is used with <i>noncount</i> nouns.

Try to see the similarity with Spanish. *Several* means "varios", related to numbers, so it can only be used with countable nouns. Spanish uses *many* ("muchos") and *much* ("mucho") in the same way English uses them.

many chairs = muchas sillas

much salt = mucha sal

how many = cuantos

how much = cuanto

The same is true for *a few* and *a little*.

a few chairs = pocas silla

a little salt = un poco de sal

Let's add to this list the words *some* and *any*. Both *some* and *any* mean "algunos". The difference is that *some* is used in affirmative sentences, and *any* is used in negative sentences and questions. These words can be used with nouns that are countable and plural or uncountable nouns.

To make this more complicated, some nouns can be countable or uncountable depending on the context. An example is the word *pizza*. When *pizza* refers to a whole unit, it is countable. For example: *I bought three pizzas*. This means that someone bought three whole pizzas. But when *pizza* refers to a usable portion, it is uncountable. For example: *Is there any pizza? I want a slice*.

Notice that to make an uncountable noun countable, a unit of measure is needed—a quantity, the container, or the division/portion. In the example above, *slice* is the unit of measure. Other examples would be “2 cups of coffee” or “250ml of water”. Liquids are always uncountable; to make them countable, the measurement must be used. Look at the charts below for more examples.

## 11-6 NOUNS THAT CAN BE COUNT OR NONCOUNT

Quite a few nouns can be used as either count or noncount nouns. Examples of both count and noncount usages for some common nouns follow.

## 11-7 USING UNITS OF MEASURE WITH NONCOUNT NOUNS

- (a) I had *some tea*.
- (b) I had *two cups of tea*.
- (c) I ate *some toast*.
- (d) I ate *one piece of toast*.

To mention a specific quantity of a noncount noun, speakers use units of measure such as *two cups of* or *one piece of*. A unit of measure usually describes **the container** (*a cup of, a bowl of*), **the amount** (*a pound of, a quart of*),\* or the **shape** (*a bar of soap, a sheet of paper*).

\*Weight measure: *one pound* = 0.45 kilograms/kilos.

Liquid measure: *one quart* = 0.95 litres/liters; four quarts = one gallon = 3.8 litres/liters.
