

Advanced Worksheet - Week 38

Name: _____ Class: _____

2 Read and complete the text with the given words.

vertebrates (x2)
reptiles

amphibians
cold-blooded (x2)

mammals
warm-blooded

(1) _____ are animals with backbones. The following groups are the different types of (2) _____.

Fish

Fish are (3) _____ animals and they live in water. They have got scales and fins. They haven't got lungs. They have got gills instead.

(4) _____

All of them are (5) _____ and they feed their babies milk. Most of them live on land, for example, humans and dogs. However, some of them, like whales, live in water, but they haven't got gills. They have all got lungs.

Birds

Birds live on land, but some of them look for food in the water. They have got feathers, two legs, and two wings. Some birds, like ostriches and kiwis, can't fly. All birds lay eggs.

(6) _____

When they are young, they live in water and they haven't got lungs. When they are adult, they have got lungs and four legs – for example, frogs and toads.

(7) _____

Most of them live on land. They have got lungs and scales but not gills. They haven't got any wings or feathers and they haven't got any hair. They are (8) _____ animals and many of them live in warm places.
