

1. Read the text and answer the questions about it.

I'm Jackie. My dad says that he's got one of the most complicated telescopes because it's really big. He keeps it in our attic. There's a window in the attic and you can see the stars through it. Some nights, when there aren't any clouds, you can see stars and planets and comets. It's amazing! I'm always asking my dad 'Which star is the closest?' or 'Which planet is the most interesting?'. He tells me that the most interesting planet isn't Mars, there are more interesting planets than Mars. I love asking questions. My dad is brilliant! He knows the answer to every question! Tonight, Dad wants to take the telescope outside because we can see more. He says it isn't very cold but I should put a coat on. He says we can see more planets and stars if we go outside. Right! I'd better get my jacket and boots on. Looking at the stars is the best way to learn about space.
