Amazing animals: the blue whale

Blue whales are ¹**b**_____ animals, but they're amazing for lots of other reasons, too. They're very large. Some adult blue whales are 30 metres ²**l**_____. And, of course, they're very ³**h**_____. One adult blue whale weighs about 136,000 kg – that's the same as 300 ⁴**h**_____, 2,200 men or 6 million ⁵**m**____! Blue whales are also very ⁶**n**_____. They communicate in different ways using different sounds. It's difficult for humans to hear these noises, but to other whales, they aren't ⁷**q**_____ at all – whales can communicate over very long distances. They're very ⁸**c**_____, too. For example, it's possible that they understand numbers.

What animal do you think is amazing? Why?
