

**Task 2: Reread the reading text, then complete the paragraph below with the words in the box.**

|               |             |               |           |
|---------------|-------------|---------------|-----------|
| collaborating | difficult   | approximately | resembles |
| tackle        | innovations | advantage     | invent    |

Is it possible for simple ideas to change the world? One new idea at a time, they might just succeed. Designers and scientists are (1) \_\_\_\_\_ to create products for people in developing countries. Some of their (2) \_\_\_\_\_ have the potential to solve even the most pressing issues, such as improving access to healthcare and clean water. Every year, (3) \_\_\_\_\_ 19 million low-birthweight babies are born in developing countries. When these babies are born, they weigh less than 5.5 pounds (2.5 kilograms). Because they don't have enough fat on their bodies, it is (4) \_\_\_\_\_ for low-birthweight babies to stay warm.

Many babies get too cold and die. To (5) \_\_\_\_\_ this problem, the Embrace infant warmer was (6) \_\_\_\_\_ by American entrepreneur Jane Chen and a team of people. It (7) \_\_\_\_\_ a small sleeping bag and was created specifically to keep babies warm. It's filled with wax that easily heats up to 37 degrees Celsius, which is the normal temperature of the human body. Another (8) \_\_\_\_\_ of the Embrace infant warmer is that it does not require electricity to work. It's an easy-to-use, low-cost solution. More than 200,000 babies have been saved as a result of this simple invention.
