

SECTION 2 : Hadley Park Community Garden Project

Good morning - it's great to see so many people here. Thank you all very much for coming. Well, as you know, the community (1) _____ at Hadley Park are really not looking as good as they should, quite bad really, and although the local (2) _____ has a (3) _____ to deal with some of the problems, we do need (4) _____ for other tasks.

If you don't mind, I'm going to (5) _____ you into two groups. So, everyone on this side of the room is Group A, and the (6) _____ of you are Group B. So, Group A, there are a couple of things we'd like you to help with.

Um first of all, don't worry about any (7) _____ or empty (8) _____ you see lying about - one of the local (9) _____ has offered to help out with that as part of their own environmental project. The (10) _____ for you will be to give us a hand with the new wooden fencing - it needs constructing along parts of the (11) _____ track, as there are parts which have now fallen down or broken - as I'm sure you've seen.

You've probably also noticed that some of the (12) _____ that come from the bicycle track are quite (13) _____ - and there are plans to make them wider - but the (14) _____ will be dealing with that later in the year, and they've also promised to produce some informational (15) _____ about the plants in the gardens. Hopefully they'll be up in a few weeks' time.

The other thing we're doing is getting rid of some of the (16) _____ species that are growing in the (17) _____ and putting back some (18) _____ plants and trees. So, you'll be doing some digging for us and getting those into the (19) _____.

So, Group A, there's some (20) _____ you'll need to bring along with you. I was going to say (21) _____ but the (22) _____ has changed so you can leave those at home. I'd definitely recommend a strong pair of (23) _____ waterproof would be best; it's quite (24) _____ at the moment, and your own (25) _____ would also be advisable.

(26) _____ will be available - spades and (27) _____, that kind of thing. You just need to make sure they go back in the (28) _____. And, there's no need to worry about food and drink as we'll be supplying (29) _____ and coffee - possibly some (30) _____, even!

OK, Group B. your turn. Does everyone have a copy of the plan? Great. OK, we'll all be meeting in the car park - that's on the bottom of the plan, see? Now, if you've been assigned to the (31) _____ beds, to get there, you go out of the car park and go up the (32) _____ until you reach the (33) _____ of trees - there they are - in the middle of the plan, and you see that the footpath goes all the way around them.

Well, on the left-hand side of that (34) _____ footpath, there's a short (35) _____ which takes you directly to the vegetable beds. You can see a (36) _____ fence marked just above them. All right? OK, if you're helping out with the (37) _____, pay attention.

Look again at the circle of trees in the middle of the plan, and the footpath that goes around them. On the right side of that circle--you can see that the footpath goes off in an (38) _____ direction - heading towards the right hand side of the plan. And then the path splits into (39) _____ and you can either go up or down.

You want the path that heads down and at the end of this, you see two areas divided by a bamboo (40) _____ - and as we're looking at the plan, the bee (41) _____ are on the right of the fence - the smaller section. I mean.

Now don't worry - all the bees have been removed! You just need to (42) _____ the hives back to the car (43) _____. OK, for the (44) _____, look at the circular footpath at the top of it, there's a path that goes from there and takes you up to the seating area, alongside the bicycle track and with a good view of the (45) _____, I suppose.

OK, if you're volunteering for the (46) _____ playground area, let's start from the car park again and go up the footpath, but then you want the first (47) _____ turn. Go up there and then you see there's a short path that goes off to the right - so down there and that's the adventure playground area, (48) _____ the bamboo fence.

That fence does need repairing, I'm afraid. Right, what else? Oh yes, the (49) _____. We've got that circular footpath in the middle - find the track that goes east towards the right-hand side of the plan, and where that track divides, you need the little path that goes up towards the bicycle track.

The sand area is just (50) _____ the bamboo fence there. And finally, the (51) _____. So, it's on the left-hand side of your plan - towards the top - just above the fruit (52) _____ and to the left of the little path. OK, as I said already, hopefully we'll ...
