

Chapter 22

Measurement

Measurement plays an important role in our day-to-day life. We measure various things in our daily life such as weight, height, length etc.

Here some measurement units and their details are given below. Match them carefully :

Units	Details
1. Hertz	(a) A unit of weight
2. Calorie	(b) A unit of speed in navigation
3. Erg	(c) A unit of pressure
4. Kelvin	(d) A unit of work or energy
5. Knot	(e) A unit of liquid
6. Volt	(f) A unit of pressure
7. Barrel	(g) A unit of electric potential
8. Joule	(h) A unit of electric current
9. Fathom	(i) A unit of power
10. Dyne	(j) A unit of frequency
11. Bar	(k) A unit of work or energy
12. Angstrom	(l) A unit of wavelength of light
13. Pascal	(m) A unit of marine depth
14. Watt	(n) A unit of temperature
15. Quintal	(o) A unit of force
16. Ampere	(p) A unit of heat

BOOST UP

Metre is a unit to measure length and kilometre is 1000 metre distance (length).
