

Measurement plays an important role in our day-to-day life. We measure various things in our daily life such as weight, height, length etc.

Here some measurement units and their details are given below. Match them carefully :

Units

Details

1. Hertz
2. Calorie
3. Erg
4. Kelvin
5. Knot
6. Volt
7. Barrel
8. Joule
9. Fathom
10. Dyne
11. Bar
12. Angstrom
13. Pascal
14. Watt
15. Quintal
16. Ampere

- (a) A unit of weight
- (b) A unit of speed in navigation
- (c) A unit of pressure
- (d) A unit of work or energy
- (e) A unit of liquid
- (f) A unit of pressure
- (g) A unit of electric potential
- (h) A unit of electric current
- (i) A unit of power
- (j) A unit of frequency
- (k) A unit of work or energy
- (l) A unit of wavelength of light
- (m) A unit of marine depth
- (n) A unit of temperature
- (o) A unit of force
- (p) A unit of heat

BOOST UP

Metre is a unit to measure length and kilometre is 1000 metre distance (length).
