

Population Pyramid

- 1 Complete the definition by dragging each Word into its space.

The population pyramid is a bar chart showing the distribution by sex and age group of a population at a given time.

- 2 Look at the population pyramid and choose the correct option.

a) What do the bars represent?

b) Why are there two colors?

c) Are there many children and adolescents?

d) Are there more adults or more children?

e) From what age do women live more?

f) To what age does the graph correspond?
