## REVIEW TEST 1

### LISTENING

#### LISTENING FOR DETAILS

**Listen to the talk about men and apes, and then complete each sentence with NO MORE THAN THREE WORDS. (RT1\_Track1)**

1. Men and apes differ little in their \_\_\_\_\_.
2. Both men and apes have \_\_\_\_\_ instead of claws or hooves.
3. Like apes, man have no \_\_\_\_\_.
4. Both apes and men differ from other animals in having \_\_\_\_\_.
5. Apes can make and use simple tools. Only man, however, can \_\_\_\_\_.

### SPEAKING

#### VOCABULARY

##### TOPIC: FOOD

**Exercise 1. Choose the best word or phrase to complete each sentence.**

1. I have a \_\_\_\_\_ and always crave desserts after a meal.
  - a) mouth-watering
  - b) nutritious
  - c) adore
  - d) sweet tooth
2. I enjoy trying different \_\_\_\_\_ from around the world.
  - a) traditional cuisine
  - b) ingredient
  - c) recipe
  - d) beverage
3. I have a strong \_\_\_\_\_ for spicy food.
  - a) appetite
  - b) picky eater
  - c) mouth-watering
  - d) sweet tooth

4. I usually have a \_\_\_\_\_ when I'm too busy to cook.
- a) ready meal
  - b) junk food
  - c) beverage
  - d) picky eater
5. Which word best describes someone who is very selective about what they eat?
- a) adore
  - b) picky eater
  - c) beverage
  - d) ingredient

### TOPIC: DAILY ACTIVITIES

**Exercise 2.** Use given words to complete the answer.

**1. How do you like to relax after a long day of work or studying?**

productive	energetic	devote	unwind
------------	-----------	--------	--------

**Answer:** Personally, I find it important to strike a balance between being \_\_\_\_\_ and allowing myself to \_\_\_\_\_. After a busy day, I like to engage in activities that help me relax and recharge. For example, I enjoy practicing yoga or going for a run to release any built-up stress and tension. These activities not only help me rejuvenate but also leave me feeling energized and ready to \_\_\_\_\_ myself to the tasks ahead. Finding that balance between being productive and taking time to unwind is crucial for maintaining a/an \_\_\_\_\_ and fulfilling lifestyle.

**2. How do you usually spend your weekends?**

quality time	hectic life	binge-watching	concentration
--------------	-------------	----------------	---------------

**Answer:** Well, since I have a \_\_\_\_\_ during the weekdays, I value my weekends as an opportunity to unwind and spend \_\_\_\_\_ with myself and my loved ones. Sometimes, I indulge in \_\_\_\_\_ my favorite TV shows or movies, which allows me to disconnect from the daily grind and simply enjoy the storyline. However, I also make sure to allocate some time for activities that require \_\_\_\_\_ and focus, such as reading a book or pursuing a hobby. This helps me maintain a sense of balance and ensures that I make the most out of my weekends while also recharging myself for the upcoming week.

## READING

### READING FOR DETAILS

**Read the passage and then complete the task below.**

Prairie ecosystems are characterised by even terrain or gently sloping rolling hills, and by a predominance of herbaceous plant life. Trees, shrubs, and other woody plants are virtually absent in prairies, and there is very little shelter from the solar radiation and harsh breezes. Prairies generally receive a moderate amount of yearly precipitation, but summers are occasionally marked by severe drought. Consequently, for plants to thrive in the prairie ecosystem, they must endure seasonally dry conditions. Among the herbaceous plants suited for life in these ecosystems are prairie grasses, which have several adaptive mechanisms for survival.

Leaves of prairie grasses vary in width, but most are long, thin blades. On the epidermal layer of the leaves are small holes, called stomata, which can be opened to let in carbon dioxide and release oxygen, or closed to retain moisture. Because carbon dioxide is essential for plant photosynthesis, the stomata must remain wide for gas exchange; however, air spaces within the leaf are full of water vapour, which evaporates unless the pores remain closed and presents a challenge during dry conditions. To overcome the problem, prairie grasses have evolved to distinguish between day and night. In the daytime, the grasses keep their stomata shut to minimise moisture loss. The plants then expand the pores in the evening when the air is cooler for respiration.

**Complete the notes below.**

**Choose NO MORE THAN TWO WORDS from the passage for each answer.**

#### How Prairie Grasses Survive

##### Harsh prairie conditions

- Flat land with a few small hills
- A limited amount of protection from (1) \_\_\_\_\_ and high winds
- Some rainfall every year, but summer months bring drought

##### Prairie grasses' evolutionary adaptation

- Stomata: Tiny holes on the (2) \_\_\_\_\_ of the leaves
- Open to allow carbon dioxide in and oxygen out, or closed to preserve moisture
- The stomata remain closed during the (3) \_\_\_\_\_ to decrease loss of water
- The plant pores are opened in the cooler nighttime air

## WRITING

### VOCABULARY

Fill in the blanks with the appropriate word from the given list.

reached	to	witnessed	stood	decrease
---------	----	-----------	-------	----------

1. There was a \_\_\_\_\_ of 600 in the number of customers coming to the restaurant.
2. The number of students passing the examination \_\_\_\_\_ a peak of 200 in 2023.
3. There was a drop \_\_\_\_\_ 3000 units in the amount of electricity produced after 2 years.
4. The sales figures for the past year \_\_\_\_\_ at 7000\$ in 2010.
5. 2014 \_\_\_\_\_ a sharp increase in the proportion of people who invested in stocks.

**STRATEGY: Write an introduction.**

**Read the following question and write a suitable introduction for it.**

*The line graph below shows changes in the amount and type of fast food consumed by Australian teenagers from 1975 to 2000.*
