

Activity for Visual Learner

Please watch the video!

After watch the video, answer the question below!

- 1. What is meant by environmental conservation?**
 - a. Use as many natural resources as possible**
 - b. Maintain and protect natural resources for future use**
 - c. Ignoring the environmental impacts of human activities**
 - d. Using technology for the exploitation of natural resources**

- 2. What are the main impacts of deforestation?**
 - a. Improved air quality**
 - b. Loss of animal habitat**
 - c. Increase in wild animal population**
 - d. Global temperature drop**

- 3. What is meant by recycling?**
 - a. Burning waste to produce energy**
 - b. Reprocessing used materials into new products**
 - c. Bury trash in the ground**
 - d. Reusing products without processing them**

- 4. Which of the following is a renewable energy source?**
 - a. Coal**
 - b. Crude oil**
 - c. Solar power**
 - d. Natural gas**

- 5. Why is it important to reduce the use of single-use plastic?**
 - a. Single-use plastic is easily decomposed in nature**
 - b. Single-use plastic can be recycled infinitely**
 - c. Single-use plastic pollutes the environment and takes a long time to decompose**
 - d. Single-use plastic is cheap and easy to get**

6. What is meant by carbon footprint?

- a. The size of the carbon used in the product**
- b. Total greenhouse gas emissions produced by human activities**
- c. The amount of carbon in the atmosphere**
- d. Carbon contained in fossil fuels**

7. What is the aim of the reforestation program?

- a. Adding commercial buildings in urban areas**
- b. Reducing the number of trees in forest areas**
- c. Plant trees and increase vegetation cover**
- d. Replacing native plants with imported plants**

8. Which of the following is an example of sustainable agricultural practices?

- a. Excessive use of chemical pesticides**
- b. Crop rotation to maintain soil fertility**
- c. Forest burning for new agricultural land**
- d. Continuous use of monoculture**

9. What is meant by clean energy?

- a. Energy is produced without producing pollution**
- b. Energy produced from fossil fuels**
- c. Energy that comes from the combustion process**
- d. Energy that does not require further processing**

10. How to reduce water pollution?

- a. Throwing rubbish into the river**
- b. Excessive use of fertilizers and pesticides**
- c. Processing industrial waste before disposing of it into rivers**
- d. Increase the number of factories on the riverbank**
