Dear Fred,

It was a real sorrow that I heard this morning of your great loss. I knew your mother was ill. For your brother told me several weeks ago. However, as he at that time did not seem to think. The illness was very serious, the news of your mother's death came to me as a shock. You have my sincere and heartfelt sympathy, my dear fellow, in your sorrow. I know you will feel it deeply, for you always thought so much of your mother and loved her so truly. I feel it also as a personal loss to myself for your mother was always very kind to me. I admired her a good and noble woman. Her death must be a terrible grief to your father too. Please assure him of my sincere sympathy.

Words, I know, are poor comforters. "The heart knows its own sorrow", and in such sorrows we are always alone. However, it is not mere words when I say that I feel with you in your sorrow.

Your sincere friends,

Jack

What is photosynthesis? Photosynthesis is a food-making process that occurs in green plants. It is the chief function of leaves. The word photosynthesis means putting together with light. Green plants use energy from light to combine carbon dioxide and water to make sugar and other chemical compounds. How is the light used in photosynthesis? The light used in photosynthesis is absorbed by a green pigment called chlorophyll. Each food-making cell in a plant leaf contains chlorophyll in small bodies called chloroplasts. In chloroplast, light energy

causes water drawn from the soil to split into hydrogen and oxygen. What are the steps of photosynthesis process? Let me tell you the process of photosynthesis, in a series of complicated steps, the hydrogen combines with carbon dioxide from the air, forming a simple sugar. Oxygen from the water molecules is given off in the process. From sugar together with nitrogen, sulfur, and phosphorus from the soil-green plants can make starch, fat, protein, vitamins, and other complex compounds essential for life. Photosynthesis provides the chemical energy that is needed to produce these compounds.
