

Chapter 58

Artificial Satellites

Man-made satellites are called artificial satellites.

Name these artificial satellites :

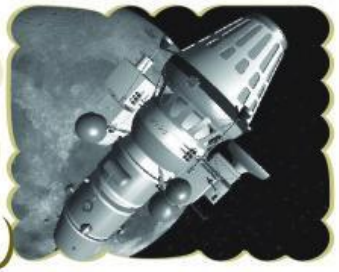

1. The first space probe to orbit the planet Jupiter.

2. The first manned satellite to orbit the Earth.

3. The first space probe to visit Mercury.

4. The first space probe that returned with a sample from a comet.

5. The first spacecraft to orbit the moon.

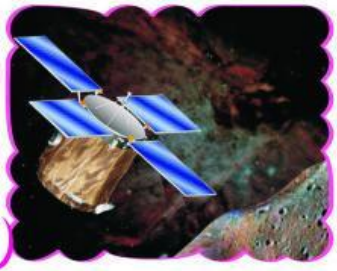

6. The first space craft to land on an asteroid.

7. The first space probe to land on a satellite of another planet.

8. The first space probe that impacted on a comet.

Help Card

Pioneer-10, Luna-10, Deep impact, Huygens, Vostok-I, Near Shoemaker, Mariner-10, Stardust
