*Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions.*

For thousands of years, humans have explored the Earth. Now astronomers are exploring space, looking for new planets or a 'new Earth' for humans to live on in the future. But what will a 'new Earth' look like? And how do we find a 'new Earth'?

First of all, astronomers look for a star. That's because our own Earth orbits a star – the Sun. When astronomers have found a star, they look for planets around it. Once they find a new planet, it's important to measure the distance between the planet and the star. In fact, most planets, unlike our Earth, are either too near to the star or too far away.

When they find a planet in a good position, astronomers look for three things: water, air and rock. Water is important because if humans go there, they will need water to drink and to grow plants. If plants can be grown, they can produce air for humans to breathe. Then, astronomers also look for rocks, as water is often under the rocks.

In recent years, astronomers have found a few planets that are very similar to the Earth. For example, Gliese 581g is a planet at a safe distance from the nearest star. Astronomers think it has water and rocks. The average temperature is between -31°C and -4°C, which is not too hot or cold.

than Antarctica or the Arctic Circle. Humans can live in those temperatures.

However, there is one problem – the distance. Gliese 581g is 18 trillion kilometers from the Earth. With current space technology, it will take humans 766,000 years to travel there.

**Question 31.** The main idea of the passage is \_\_\_\_\_.

- A. the problem with Gliese 581g
- B. the creation of an alternative Sun
- C. the development of space exploration
- D. the search for a new planet to live on

**Question 32.** In what way is Gliese 581g very similar to the Earth as mentioned in the passage?

- A. Gliese 581g and the Earth have the same average temperature of  $-31^{\circ}\text{C}$  to  $-12^{\circ}$ .
- B. It is neither too near nor too far from the nearest star.
- C. It has air.
- D. It actually has water and rocks.

*Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct word that best fits each of the numbered blanks.*

When you read something in English, not surprisingly, you will frequently come across words you do not fully understand. One of (36) \_\_\_\_\_ first things you do may be checking the meaning in a dictionary. Alternatively, you might make a guess. The strategy you adopt depends (37) \_\_\_\_\_ on the degree of accuracy you require and the time at your disposal.

If you are the sort of person (38) \_\_\_\_\_ tends to turn to the dictionary frequently, it is worth remembering that every dictionary has its limitations. Each definition in dictionaries is only an approximation and learners build up a picture of the meaning of a word only after meeting it in (39) \_\_\_\_\_ contexts. It is also important to recognize the dangers of dictionaries that (40) \_\_\_\_\_ from English into your native language and vice versa. If you must use a dictionary, it is usually safer to use an English-English dictionary.
