

Part 5

Questions 21–26

For each question, choose the correct answer.

What will cars be like in the future?

Cars today are nothing like the ones that were driven a century ago. So it's difficult to (21) what cars might be like 100 years from now. Because vehicles nowadays create a number of serious problems on our roads, it's likely that future cars will actually be very different.

It's certain that technology will strongly (22) the design of future cars, with computers becoming even more important. Some scientists and engineers are even (23) that in the future, there could be some kind of flying car, which will travel several metres above the ground!

Most people, however, agree that cars should (24) environmentally cleaner, so car companies are likely to (25) the engines we have now with ones that can use clean fuels and other (26) of green energy.
