### Choices (Setting Goals) - Notes and Questions

"Goals" are basically desires that are put into action through a plan. Children, who start ahead, stay ahead. **Goal setting** is by far the best way to start ahead and secure one's future.

Effective **goal setting** is one of the most important habits one can develop. It is an essential skill for achieving success in all areas of life.

Two biblical examples of persons who achieved their goals are **Noah and Nehemiah**. Noah took a long time but he completed the ark God instructed him to build.

Nehemiah supervised the rebuilding of the walls of Jerusalem. Both of these men experienced challenges and opposition. However, they did not give up.

You can formulate or make personal goals based on the main areas of your life. These areas are **spiritual, academic, physical** and **social**.

A spiritual goal may be to spend quiet time with God each day.

An academic goal may be to achieve a B+ in Mathematics.

A physical goal may be to exercise or spend time outside each day.

A social goal may be to make a new friend.

After goals have been formulated, individuals must outline **steps** needed to achieve goals.

1. List the strategies for achieving goal
2. List the resources needed
3. Consider possible blocks and ways of dealing with challenges
4. Set deadlines
