

Module: **Health – Medical Tests**
Competency: **Reading CLB 3**
Task: **Match term with meaning**

Put the number of the definition in the box left of the name.

For example, the definition for A1C is Number 10, blood test that checks for blood sugar.

10	A1C	1. Uses urine to check for bladder infection, etc.
	Biopsy	2. Uses sound waves to check internal organs and fetus.
	EEG	3. Uses radiation to check body.
	EKG or ECG	4. Uses magnetism to check body.
	FIT	5. Special kind of x-ray that checks for breast cancer.
	Mammogram	6. Skin test that checks for tuberculosis.
	MRI	7. Checks growths or lumps for cancer.
	TB test	8. Checks electrical activity in the heart.
	Ultrasound	9. Checks brain activity.
	Urine test	10. Blood test that checks for blood sugar.
	X-ray	11. At home test that checks for blood in stool (maybe colon cancer).
