

Name _____ Date _____

REMEMBER HOW TO ...

Take clear notes

- Know why you need your notes. Focus on relevant information.
- Decide how to organize your notes: headings and bullet points, or a network or a mind map?
- Leave space to add further information.
- Only write words and short phrases. Use abbreviations: *i.e.*, *e.g.*, >, =
- Check your notes while your memory's fresh.

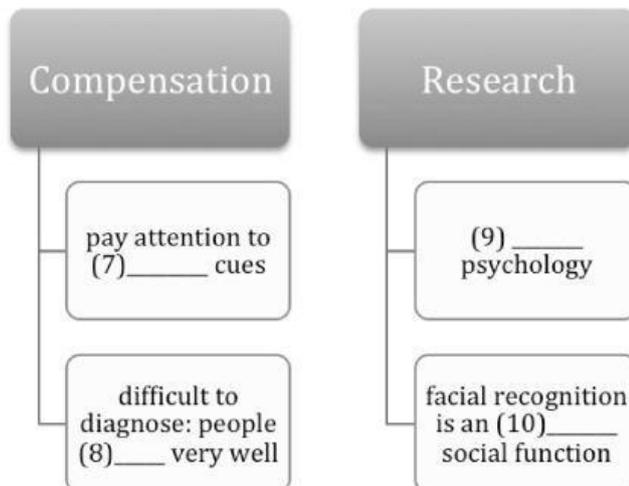

▶ PLAY Section 1

Choose true (T) or false (F).

- 1 The talk is about a very common neurological disorder.
- 2 Prosopagnosics have problems remembering people's names.
- 3 Scientists still can't explain exactly how the brain can recognize faces.
- 4 Recognizing people out of context is difficult even for people without the disorder.
- 5 Dr. Jackson has prosopagnosia.
- 6 Prosopagnosics are unable to recognize faces they see every day.

▶ PLAY Section 2

Complete the mind map with the words or short phrases that you hear.
