

Challenge #2

Mr. Young is having a party and he has a lot of friends. There will be 127 people at the party and he is working out how many tables he needs for everyone.

Each table can hold 8 people.

Questions:

1. **How many tables will he need?**

2. **How many will be sitting at the last table?**

3. **It costs $25 per person for the food. How much will it cost for everyone? $**
