Grouping dotted notes

We've learnt that quavers and semiquavers can be beamed together so that they are grouped into beats. The same is true of dotted notes: you will often see a dotted quaver joined to a single semiquaver.

Exercise 9 Tick (✔) **one** box for each question to show which bar is grouped correctly.

a 

b 

c 

d 

Exercise 8 Add the time signature to each of these bars.

a 

b 

c 

d
