

# ***FACTS OR LIES ?***

**Read the following statements. Some of them are facts and some other are lies. Select the option that you consider correct. Write the correct definitions of the fake ones.**

Does a price tag measure the weight of an item?

Do stores often have sales to sell items at lower prices?

Can special offers at stores give you extra items or a lower price?

Are discounts only available during holidays?

Do coupons give you a discount on a product?

Do you need a sale/discount code to enter a store?

Is it a bargain when you buy something at a very high price?

Do you get a refund if you want to return a product you do not like?

Is a receipt only needed when buying online?

**Read the following text and complete the activity on the next page:**

## ***SHOPPING ROUTINES:***

Every Saturday, Maria visits the mall. She loves looking for good deals. Today, she sees a beautiful dress with a price tag that says \$50. However, the store has a sale, so the dress is cheaper. Maria finds a special offer that gives her a 20% discount on the dress. She also has a coupon that gives her an extra 10% off. She uses a sale/discount code to get this additional discount. Maria is very happy because she gets the dress for a bargain price.

At the checkout, she pays for the dress and receives a receipt. The cashier tells her to keep the receipt in case she wants a refund. Maria loves shopping, and she always looks for the best deals. She never misses a sale, and she always uses her coupons and discount codes.

Maria does not buy anything without checking the price tag first. She does not like paying full price when she can find a bargain. Today, she does not need a refund because she loves the dress. Maria leaves the mall feeling very happy with her purchase.
