A PROBLEM-SOLUTION ESSAY (INTRODUCTORY PARAGRAPH)

by Julian Conde

I. Complete with the following words: solutions, hook, transition word and thesis statement

Littering is a serious problem that has many negative consequences for the environment and for public health. It can lead to the degradation of natural habitats, pollution of waterways and soil, and harm to wildlife. In addition, littering can increase the risk of disease and injury to humans, as well as create unsightly and unhygienic conditions in public spaces. Fortunately, there are several solutions to the problem of littering, including education, enforcement, and the use of technology. By addressing the issue of littering, we can help protect the environment and improve public health.

II. Complete the introductory paragraph.

The bustling cityscape is marred by an _____ the streets, causing delays, frustration, and pollution. _____, there are several innovative solutions that could help alleviate the traffic congestion nightmare. One promising idea is to encourage citizens _____, reducing the number of cars on the road and freeing up space.
