**IV. Read the passage and tick True or False.**

Different technologies have made our lives easier in different ways. However, in effect, most technologies reduce our labour and save us valuable time, thus improving our quality of life considerably. They also in a way reduce our need on others because we can do everything on our own.

I think it's very hard to choose the most useful technologic invention. It depends upon the person and their use. For example, I find dishwashers very useful because in my house, I have the responsibility of washing utensils. For my mother, the answer might be the vacuum cleaner as she is responsible for cleaning.

Technology has improved our life in many ways but it has also brought many challenges. Life would certainly be simpler, but I wouldn't call it better. Moreover, I think we have become so accustomed to technology that just the idea of living without it is unfathomable.
