Kelas :

# Sudut apakah aku?

Sudut ada tiga jenis yaitu sudut lancip (besar sudut  $< 90$  derajat), sudut siku-siku (besar sudut  $90$  derajat), dan sudut tumpul (besar sudut  $> 90$  derajat)

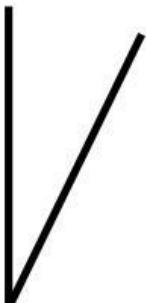

## Latihan

Tulislah sudut tersebut termasuk sudut lancip, sudut siku-siku, atau sudut tumpul

Kelas :

# Sudut Berpenyiku

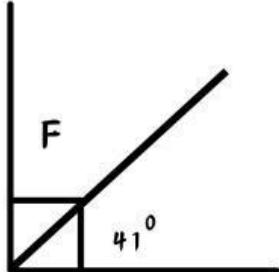

Dua buah sudut disebut berpenyiku apabila jumlah besar kedua sudut tersebut adalah 90 derajat.

$$\angle AOB + \angle BOC = 90$$

## Latihan

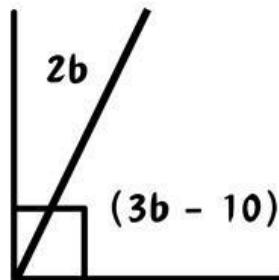

Carilah besar sudut yang belum diketahui!

1

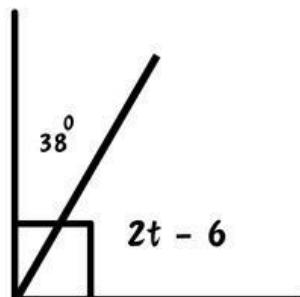

$$\angle F = \dots\dots\dots$$

2

$$b = \dots\dots\dots$$

3

$$t = \dots\dots\dots$$
