

(.....)

Humans can live almost anywhere, but we often look for three things: climate, water, and soil. People like a temperate climate, somewhere that's not too hot and not too cold. We need water to drink and to help our crops grow. We need fertile soil, so the crops have lots of nutrients. These three things often come together. Places with water usually have fertile soil and a temperate climate.

1-From the text find the word mean “ **Vitamins** “

2- From the text find the opposite of “ **not too hot and not too cold**“
