Cand A : Hi Abu?

Cand B : Hi Ali.

Cand A: We are going to talk about ways to stay safe when using e-payment

Cand B: Ok sure.

Cand A : Firstly, In my opinion, ways to stay safe online when using e-payment is to _____.It is because when you use a weak password, a stranger can break into your banking app easily. For example, _____.Therefore, we can protect our personal information. Do you agree with me?

Cand B : Yes I definitely agree with you. Besides, ways to stay safe when using e-payment is by monitoring transaction notifications. It is because it can give us _____. For example, you can detect the amount of money coming in and out from your banking account. Thus, we can_____.What do you think?

Cand A : I think the same but Other than that, In my opinion, other ways to stay safe when using e-payment is to secure your device. It is because hackers can get into your device easily . For example,_____. Thus, we can_____. What about you?

Cand B : Yes, I do agree with you.Furthermore, ways to stay safe when using e-payment is by _____. It is because _____. For example, we can report it right after we get notifications about unauthorized transactions. Hence, we can avoid financial loss from happening.

Cand A : Moreover, ways to stay safe when using e-payment is by avoiding doubtful websites.It is because we can avoid providing our personal information through the website. For example,_____. So that we can_____.Do you agree with me?

Cand B : Yes I do. Last but not least, ways to stay safe when using e-payment is by_____. It is because many people used to download banking apps on websites. For example, we can_____. Thus, we can avoid getting hacked .

Cand A: Ok That is the end of our discussion. Thank you.

PART 2

Cand A/B : We both decide that the best ways to stay safe when using e-payment is by use strong password as it is
 so important to every e-payment app.

Cand A: Because we can avoid strangers from getting into our banking account.

Cand B: Because we can protect our personal information from getting stolen.

use a strong password
avoid using easy guest password information like birthdays or simple words
information about every transaction
be aware of any suspicious transactions
you can keep updates to the latest software updates
we can protect our devices from getting hacks
reporting unauthorized transactions
we can prevent fraud
avoid clicking any suspicious websites with the suspiciousURL address
avoid scams from happening
 checking app security
download banking apps from the app store and google app store
