

The Structure of the Earth

1. Label the layers in the structure of the Earth.

Mantle - Crust - Outer Core - Inner Core - tectonic plates

2. Answer the following questions.

Which layer do we live on?	
Which layer generates Earth's magnetic field?	
Which layer is the hottest?	
On which layer does the crust float?	
What are the two main metals that make up the outer and inner core?	
What moves the mantle layer?
