

## Activity 2 Reading

Read the article about rainforests and mark the statements as true (T) for false (F).

### Save the rainforest!

It is very important to save rainforests. They are the home of many animals including birds, insects as well as bigger animals like monkeys and jaguars. In some rainforests, trees are cut down because people want to

use the wood. We need to stop. The trees are needed to clean our atmosphere. The more trees we have the more oxygen we have. We can help rainforests by planting more trees. This will create more space for animals to live and the trees will release more oxygen into the atmosphere.

- 1 Both small and large animals live in rainforests. T / F
- 2 Jaguars do not live in rainforests. T / F
- 3 The writer wants people to stop cutting down trees. T / F
- 4 Planting more trees is bad for animals. T / F
- 5 Trees release oxygen into the atmosphere. T / F
