The homing instinct

The homing instinct is what makes certain animals, birds and fish return **(0)** the place they consider home. Cats often have this instinct. It was particularly strong in an American cat called Ninja, which disappeared shortly **(9)** its owners had taken it to their new home; a year later the cat turned up at its old home even **(10)** this was 1,360 kilometres away from **(11)** its owners were now living. Pigeons also have the homing instinct and, ever **(14)** ancient times, human beings have used them to carry messages back home. However, cat owners, **(15)** have to keep returning to their old address in **(16)** to bring their cat home, tend to find the homing instinct simply irritating rather than useful or interesting!

It was **(21)** thought that people living in Britain at this time were nomadic with no fixed homes. But the **(22)** of the oldest known house provides clear **(23)** that some of these people built large permanent structures. Researchers of the site, however, are **(24)** about how long the house will remain the 'oldest' in the UK, because new finds are being made all the time.
