

Reading Unit 4

1. What is the primary advantage of fast-casual dining compared to traditional sit-down restaurants?
 - a) It is less expensive than fast food.
 - b) It offers a higher standard of dining without the high cost.
 - c) It is more popular than traditional dining.
 - d) It is always healthier than other dining options.
2. Which of the following statements best describes fast fashion?
 - a) It is marketed towards people who prefer exclusive high-end fashion.
 - b) It provides trendy clothing at a higher price than high-fashion brands.
 - c) It offers high-fashion trends at a much lower price.
 - d) It is known for using high-quality materials that last a long time.
3. What does the term "cost-per-wear" refer to in the context of clothing?
 - a) The total cost of an item divided by the number of times it is worn.
 - b) The price of an item when it is bought in bulk.
 - c) The original price of a clothing item.
 - d) The price you pay for an item before any discounts are applied.
4. Why is the cost-per-wear of fast fashion items typically high?
 - a) They are made of high-quality materials.
 - b) They are designed to last longer than traditional clothing.
 - c) They are made of cheap material and easily ruined.
 - d) They are worn less frequently because they are special items.
5. What is the author's main suggestion for becoming a smarter shopper?
 - a) Only buy high-fashion brands.
 - b) Focus on the cost-per-wear of items to assess their value.
 - c) Buy clothing only during sales.
 - d) Avoid fast-casual dining and fast fashion.
6. What is one reason the author suggests that fast fashion may not be as good a deal as it seems?
 - a) Fast fashion brands often go out of style quickly.
 - b) Fast fashion items are usually only available for a limited time.
 - c) The low price point encourages frequent purchases, leading to more spending in the long run.
 - d) Fast fashion items are difficult to find in stores.
