### A hundred years of change

#### A

Life in the year 2000 was very different from life in 1900. In <sup>1</sup> 1900 in the USA, there were three and a half children in an average family. The top boy's name was John and the top girl's name was Mary. In <sup>2</sup> \_\_\_\_\_, the top names were Jacob and Emily and there was only one child in each family.

#### B

In <sup>3</sup> \_\_\_\_\_, there were 54 million new cars on the roads. In <sup>4</sup> \_\_\_\_\_, there were only 4,000 new cars. In cities transport was by horse and a small number of buses.

#### C

The number of people in cities was very different. London was the top city in <sup>5</sup> \_\_\_\_\_ with 6 million people. The top city in <sup>6</sup> \_\_\_\_\_ was Tokyo with 27 million people.

#### D

Women's lives were very different both at home and in public. For example, in the <sup>7</sup> \_\_\_\_\_ Olympics there were 827 women and 1,512 men, but in <sup>8</sup> \_\_\_\_\_ there were 1,319 men and only 19 women.

#### E

<sup>9</sup> \_\_\_\_\_ was the year of the Kodak Brownie camera. Letters were the only way to communicate except for telephones in some rich families. In <sup>10</sup> \_\_\_\_\_, email was big and there were mobile phones with cameras.

B Read the text again and complete the information with 1900 or 2000.
