

# Listening for B2 level

## Multiple Choice Questions

- 1. What does AI stand for?**
  - A) Automated Intelligence
  - B) Artificial Intelligence
  - C) Advanced Intelligence
  - D) Applied Intelligence
- 2. Which of the following is a subset of AI?**
  - A) Quantum Computing
  - B) Machine Learning
  - C) Data Analytics
  - D) Cloud Computing
- 3. What type of learning uses labeled data?**
  - A) Unsupervised Learning
  - B) Reinforcement Learning
  - C) Supervised Learning
  - D) Deep Learning
- 4. Which AI technology involves understanding human language?**
  - A) Robotics
  - B) Machine Learning
  - C) Natural Language Processing
  - D) Computer Vision
- 5. What is the goal of reinforcement learning?**
  - A) To classify data
  - B) To identify patterns in data
  - C) To make decisions based on rewards and penalties
  - D) To predict future events
- 6. Which field uses algorithms to recognize patterns and make predictions?**
  - A) Natural Language Processing
  - B) Robotics
  - C) Machine Learning
  - D) Expert Systems
- 7. What does NLP stand for?**
  - A) Neural Learning Processing
  - B) Natural Language Processing
  - C) Network Language Programming
  - D) Numeric Language Protocol
- 8. Which type of AI involves creating physical robots?**
  - A) Machine Learning
  - B) Natural Language Processing
  - C) Robotics
  - D) Expert Systems
- 9. What is a primary concern associated with AI?**
  - A) Increased data storage
  - B) Job displacement
  - C) Faster internet speeds
  - D) Higher software costs
- 10. In unsupervised learning, what type of data is used?**
  - A) Labeled Data
  - B) Predefined Data
  - C) Unlabeled Data
  - D) Processed Data

**11. What is the focus of AI ethics?**

- A) Enhancing hardware performance
- B) Addressing privacy, bias, and job displacement
- C) Improving algorithm speed
- D) Expanding cloud storage

**12. Which of the following applications uses AI for communication?**

- A) Chatbots
- B) Weather Forecasting
- C) Video Compression
- D) Database Management

**13. What is the primary use of supervised learning?**

- A) To find hidden patterns
- B) To make decisions in dynamic environments
- C) To predict or classify based on labeled data
- D) To understand human language

**14. What does reinforcement learning primarily focus on?**

- A) Recognizing speech
- B) Classifying images
- C) Learning through trial and error with rewards
- D) Processing natural language

**15. Which technology allows machines to translate languages?**

- A) Robotics
- B) Expert Systems
- C) Natural Language Processing
- D) Machine Learning

**16. What is one challenge of AI in terms of societal impact?**

- A) High energy consumption
- B) Privacy concerns
- C) Software compatibility
- D) Hardware limitations

**17. What field combines AI with physical devices?**

- A) Natural Language Processing
- B) Machine Learning
- C) Robotics
- D) Data Science

**18. In which AI technology is decision-making based on a system of rewards and penalties?**

- A) Supervised Learning
- B) Unsupervised Learning
- C) Reinforcement Learning
- D) Deep Learning

**19. What does the term 'bias' in AI refer to?**

- A) Hardware issues
- B) Inaccurate data processing
- C) Prejudiced or unfair outcomes in decisions
- D) Increased computational power

**20. What is a key benefit of AI in the medical field?**

- A) Reducing patient data
- B) Automating routine tasks and improving diagnostics
- C) Increasing manual record keeping
- D) Limiting research opportunities

## American Passport
