

Set Symbols

Choose the correct set symbol from the list below to match the correct definition.

| | Set Symbols | Definition |
|-----|-------------|---|
| 1. | | Union of sets |
| 2. | | Universal set |
| 3. | | Intersection of set/ common members or elements |
| 4. | | Member/elements of a set |
| 5. | | A subset (a set within a set) |
| 6. | | Not a member/element of a set |
| 7. | | Compliment of set H (not a member of set H) |
| 8. | | Not a subset |
| 9. | | Number of members/elements in set A |
| 10. | | Null or empty set |

Set Notation

Match Column A with Column B which rewrite the following using the correct set notation

Column A

- 3 is a member of set B
- D is equal to an empty set
- The number of element is A is 10
- B is subset of A
- The intersection of set A and B
- The union of set E and F
- 6 is not a member of set A
- The universal set are wholes 1- 10
- The compliment of set H
- G is not a subset of H

Column B

$$E \cup F$$

$$H'$$

$$G \subset A$$

$$A \cap B$$

$$D = \emptyset \text{ or } \{\}$$

$$n(A) = 10$$

$$3 \in B$$

$$\mathbb{W} = \{\text{whole numbers } 1- 10\}$$

$$6 \notin A$$

$$B \subset A$$
