SEASONS OF THE YEAR

RELATE THE IMAGES WITH THEIR RESPECTIVE CONCEPTS:

SUMMER

It is characterized by the lowest temperatures of the year, with shorter days and longer nights. It is a time associated with festivities such as Christmas and New Year.

WINTER

It is characterized by a gradual drop in temperatures, shorter days and a notable transformation in the landscape, with tree leaves changing color and falling. It is a period associated with the harvest, preparation for winter and festivities such as Halloween.

AUTUMN

It is characterized by a gradual increase in temperatures, the melting of snow, and the flowering of plants. During this season, the days lengthen and nature renews itself, with trees and flowers beginning to sprout.

SPRING

It is characterized by having the highest temperatures of the year, longer days and a greater amount of sunlight. It is a time associated with outdoor activities, vacations, and the enjoyment of warm climates, as well as climatic phenomena such as heat waves.
