

## Reading Exercise

Read the following passage:

In recent years, environmental awareness has grown significantly. More people are making efforts to reduce their carbon footprint, but there are still many who don't realize the impact of their daily actions. Simple habits, like turning off lights when leaving a room, using reusable shopping bags, and walking or biking instead of driving, can make a big difference. However, large-scale changes are needed to combat climate change effectively. Governments and corporations must take responsibility and implement policies that promote sustainability. Without these changes, individual efforts, though important, may not be enough to reverse the damage already done.

1. **What is the main idea of the passage?**
  - a) People need to use reusable shopping bags to protect the environment.
  - b) Governments and corporations play a crucial role in fighting climate change.
  - c) Biking is better than driving to reduce carbon footprint.
  - d) Environmental awareness has grown, and everyone must take action to prevent further damage.
2. **According to the passage, what is the role of individuals in reducing climate change?**
  - a) Individuals have no role; it's all about governments and corporations.
  - b) Individual actions are important, but they need to be complemented by larger-scale changes.
  - c) Individual actions are sufficient to reverse the damage.
  - d) Governments should focus more on individual habits rather than policies.
3. **What can be inferred from the passage about the future of environmental efforts?**
  - a) Individual efforts will be enough if everyone makes small changes.
  - b) Environmental awareness will likely decrease in the coming years.
  - c) Without strong policies from governments and corporations, individual actions alone won't stop climate change.
  - d) Corporations are the only ones responsible for climate change.
