

THE NERVOUS SYSTEM

1. LABEL THE IMAGE ABOUT THE BRAIN.

BRAIN
STEM

CEREBRUM

CEREBELLUM

2. TRUE OR FALSE.

- The peripheral nervous system is formed by the nerves.
- The central nervous system transmits the information.
- Both the central and the peripheral nervous system are made up of neurons.
- The brain has two main parts: brain stem and cerebrum.
- The central nervous system is divided between the brain and the spinal cord.

3. MATCH THE COLUMNS.

**VOLUNTARY
MOVEMENTS**

**INVOLUNTARY
MOVEMENTS**

Remove your hand when
we get burned.

The brain stem and the
spinal cord develop
responses.

Happens when the
sensory nerves transmit
information from the
sensory organs or from
the internal organs
to the brain.

The brain develops a
response.

Hit the ball when you
play football.

Happens when the
sensory nerves transmit
information from the
sensory organs to the
spinal cord.
