

Many of us think that dinosaurs were fearsome and precious creatures. In fact, dinosaurs could be gentle and herbivorous. Also, they came in all shapes and sizes. Some were the largest land animals of all time but many of them were as small as chickens! Let's test you about these ancient creatures :

1. The word dinosaur is commonly thought to mean \_\_\_\_\_.
2. The compsognathus, was the smallest dinosaurs that ever walked this planet. It lived in the \_\_\_\_\_ period.
3. Living in the Triassic period, the \_\_\_\_\_ was about as tall as today's giraffes and had a wingspan of almost 16 metres!
4. The largest tooth of any dinosaur belongs to the most famous species called \_\_\_\_\_.
5. In the 2015 film Jurassic World, the dinosaurs Blue, Charlie, Delta and Echo are all \_\_\_\_\_.
6. The mega-sized, plant-eating \_\_\_\_\_ was first found in Argentina and named for it.
7. The Brachiosaurus, weighting an average 80 tonnes, was the \_\_\_\_\_ dinosaur ever.
8. Also a vegetarian of the late cretaceous period, the frilled and three-horned \_\_\_\_\_ could have as many as 500 teeth!

heaviest, Tyrannosaurus, velociraptors, Triceratops, Pteranodon, Terrible Lizard, Jurassic, Argentinosaurus
