You: "Hey, what's up with your bike? Did it break down?"

Andi: "Yeah, it won't start. I tried, but nothing's working."

You: "……. Have you checked the fuel and battery? Sometimes it's something simple."

Andi: "Fuel's fine, but I'm not sure about the battery."

You: "Okay, try turning on the lights or horn. If they don't work, it's probably the battery."

(Andi tries, but the lights don't turn on.)

You: "Looks like it's the battery. Do you want to try pushing it, or ……."

Andi: "……. I don't want to mess it up more."

You: "No worries, let's push it to the nearest shop."
